

RG17 / 34 - 400mm with new web strapping 

At RTL we value you as a customer and rely on your feedback. This helps us to continually improve our products so that we can better assist you in the work place.

We would like to introduce the “web strap” which is a new cone mounting system for RG17’s & RG34’s

It has been designed so that the sign fits easily over the cone.

The double strap system allows you to use it as either an RG17 - 400 dia Keep Left or RG34 - 400 dia Keep Right.

The ‘web strap’ is made from a flexible and hard wearing material which allows it to be run over numerous times without the strap breaking.

Note: Can also be made to suit the RG17.1 if required

It fits both Slimline™ and Wide profile cones

When used in conjunction with the Slimline™ cone the “web strap” fits snugly between the cone collars allowing the RG17/34 to sit further down the cone which assists in greater stability. The result is less knock downs in high wind situations.
