

INTRODUCTION

RTL has an extensive range of LED Variable Message Sign trailers for Hire¹. We have VMS trailers suitable for Motorways, State Highways, Local Body roads and also have dedicated radar activated VMS trailers for driver speed feedback within work zones or any roads where speeding traffic is a problem.

Some of our VMS trailers can even gather traffic speed data for you².

VMS trailers are ideal for road work sites, advance notice of public events or road changes or closures, public gatherings like concerts, sporting events, fairs, retail special events or even displaying public information off road within venues³.

Rent one for a day, rent one for a month, what ever your project length we can hire it to you. The longer you hire it the lower the daily rate. We even have remote control facility on selected models.

OUR FLEET..

- Advance Warning Variable Message (AWVMS) Trailer

For further technical information please download a copy of the Technical Specifications

1. Currently all our VMS hire stock is located in Auckland. Customers are free to collect the VMS trailers or we can arrange delivery for you at an additional cost.
2. There is an extra charge to supply accumulated speed data reports. The VMS will display traffic speeds or respond to traffic speed with a message at no extra cost.
3. When using VMS on or near roads always contact you local NZTA or Council road controlling authority to seek approval for VMS use. Traffic Management plans may also be required for their use on roads.
