

Do you have a problem managing vehicle speeds through your work site?

## RTL has the Solution

RTL's Temporary Speed Hump is designed to help reduce speeds in:

- Temporary Workzones
- In Emergency Situations
- At Special Events

- It is compact enough to store in a carry case and is lightweight so it can be easily moved to another site and redeployed in seconds.

Tests have shown that Temporary Speed Humps can reduce speeds up to 17%

### Features

- \* Length: 3000 mm
- \* Width: 225mm
- \* Weight: 16.3 kg
- \* Diameter stored in bag: 500mm across

Multiple speed humps can be positioned end to end to cover wider roads.

- The underside has black rubber grips, which help the speed hump grasp the road surface. The speed hump does not need to be bolted or attached to the road surface.

- Required with **Positive Traffic Control** and a temporary speed limit of 30km/h.

Drive over tests are based on:

Passenger vehicle - (less than 800kg)

Heavy commercial vehicle - (less than 4000kg)
